CORE TENETS

■ Engage our members and the community about labor’s role in advocating for tangible solutions to the climate crisis that simultaneously strengthen our middle class.

■ Let our members know that good green jobs don’t kill construction projects, but rather can actually increase economic opportunity.

■ Work to ensure a just transition for working people by insisting that those who might be displaced are retrained for the new economy, and that the green economy must create career union opportunities.

■ Build and sustain real partnerships with the local environmental movement and community groups committed to economic and environmental justice.

■ Push for bold new political and policy initiatives that effectively address economic inequality and climate change.

■ Ensure that candidates’ positions on climate justice are part of CFT’s evaluation for endorsement in political races.

■ Insist that we work towards ending our retirement systems’ investments in fossil fuels and other commercial enterprises that are contributing to catastrophic climate change.

■ Promote legislation that moves us toward sustainability and climate justice.

BOTTOM LINE

It’s real.
We need to act now to stop the worst outcomes. We don’t have time to wait.
